

Elementary/Middle School Electives

To take an elective course, students must be on level in their core subjects (Math, Language Arts/English, History & Geography/Social Studies, Science, and Bible).

Workbook

Literature & Creative Writing (Grades 2 – 6)

Students will find reading an enjoyable experience and writing a natural outlet using the Literature and Creative Writing courses. Students will have the joy of reading interesting, exciting, and classic age-appropriate literature. They will use their imaginations, visualize, and give creative responses to questions. There are creative learning activities which require critical thinking skills. Activities include but are not limited to writing a story title, creating an alternate story ending, and identifying parts of a short story. Call the Academy office for more information, including costs of required literature books.

Animal Science (Grades 2 or 3)

In each workbook, students study a specific animal. Students learn about sheep, dogs, cats, cattle, rabbits, rodents, poultry, unusual birds, spiders, snakes, toads, and frogs. Each is presented in interesting story form and, where appropriate, scriptural reference to these animals is pointed out.

Beginning Art (Grade 7 or 8)

A course designed to introduce the junior high student to the world of art and its techniques: the tools of art, shapes, line variation and shading, texture, the color wheel, landscapes, head shapes, focal points, perspective, flannel boards, and lettering. This course is intended to give students a good understanding of the concepts of art.
